SUMMARY

Full Stack Developer with strong foundations in HTML, CSS, JavaScript, React.js, Node.js, and Python, and hands-on experience building complete web applications from responsive frontend interfaces to RESTful backend APIs and database integrations. Comfortable across the full development lifecycle — design, implementation, testing, and deployment. A fast learner who adapts quickly to new technologies, works effectively in collaborative environments, and communicates technical ideas clearly. Demonstrated problem-solving ability through national-level hackathon achievements and independent project delivery.

EXPERIENCE

Vocational Trainee — Image Recognition using Machine Learning

Apr 2026 – May 2026

Tata Steel Ltd., Learning & Development Department

Jamshedpur, Jharkhand

- Developed an image classification system using Python and ML techniques in an industrial environment, building the full pipeline from data preprocessing through model evaluation.
- Wrote clean, version-controlled code; collaborated with the L&D team to refine the system based on real-world performance feedback.

TECHNICAL SKILLS

Frontend:	HTML5, CSS3, JavaScript (ES6+), React.js, Angular, TypeScript, Tailwind CSS, Bootstrap, Responsive Design
Backend:	Node.js, Express.js, Python, Flask, REST APIs, WebSockets, JWT Authentication
Databases:	MySQL, MongoDB, PostgreSQL, SQL
Version Control:	Git, GitHub
Dev Tools:	Docker, Postman, Vercel, Render, Vite, npm/yarn, Linux
Other:	Data Structures & Algorithms, OOP, DBMS, Computer Networks, Problem-Solving, Technical Communication

PROJECTS

Real Estate Listing & Property Search Platform | *HTML5, CSS3, JavaScript, React.js, Node.js, Express.js, MongoDB* 2025

- Built a fully responsive property browsing and search platform with dynamic listing display, filter/search functionality, and an intuitive UI using React.js and Tailwind CSS.
- Designed a Node.js/Express.js REST API backend with MongoDB for property data management, supporting full CRUD operations and paginated query responses.
- Applied component-driven React architecture with clean state management, mobile-first responsive design, and Git-based version control throughout development.

VocalLock — AI Voice Authentication & Spoof Detection System | *Python, Flask, React.js, REST API, MySQL* 2025

- Designed and built a full-stack voice biometric authentication application with a React.js frontend, Flask REST API backend, and MySQL-backed user management system.
- Implemented secure JWT-based authentication workflow, user registration/login, and API integration between frontend and AI-powered spoof detection backend.
- **Runner-Up at CODE CARNAGE National Hackathon (Apr 2025)** — delivered a complete working product in 24 hours.

Real-Time Network Intrusion Detection System | *Python, Flask, React.js, JavaScript, Node.js, WebSockets* 2025

- Built a full-stack security monitoring application — Python/Flask backend for live network data processing and a React.js dashboard for real-time threat visualization.
- Designed and integrated REST API endpoints connecting backend ML inference to a live frontend dashboard, with WebSocket-based streaming for real-time data updates.

AI Smart Attendance & Monitoring System | *Python, JavaScript, React.js, Flask, PostgreSQL* 2024

- Developed a full-stack attendance management platform with a React.js teacher dashboard, Flask backend, and PostgreSQL database for student records and analytics.
- Implemented user authentication, class-wise entry/exit tracking, report generation, and a clean, responsive UI accessible across devices.

EDUCATION

Bachelor of Engineering – Computer Science

2023 – 2027

ACS College of Engineering, Bengaluru (VTU Affiliated)

Bengaluru, Karnataka

ACHIEVEMENTS

- **Runner-Up, CODE CARNAGE – National Level Hackathon (Apr 2025) | Semi-Finalist, CODE BREAKER Challenge (May 2025) | Top-5 Finalist, AI-VERSE 2.0 (Oct 2025)**
